Tall fescue

Take Advantage of the Qualities of Tall Fescue in Turf Mixtures!

- Improved fineness of leaves
- Very high wear tolerance
- Highly adapted in mixtures
- Very rust resistant

Ratings

Adaptation in Mixtures

Hardly two summers are identical. Sometimes the drought is prolonged and the growth of tall fescue favoured. On the other hand humid conditions will favour species like perennial ryegrass.

Such alternating conditions...

can lead to a heterogeneous turf aspect. In our private trials we have remarked the ability of STARLETT to maintain the mixture balance.

>= 30% in mixtures

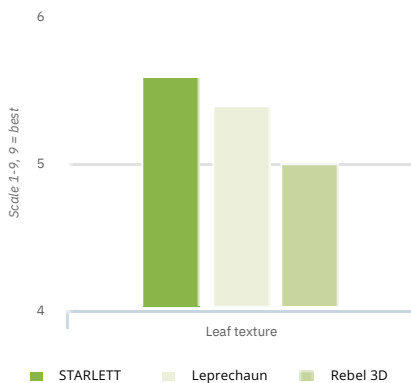

For STARLETT as for other tall fescue varieties we recommend at least 30% (weight) in the seed mixture to ensure a good start facing the more aggressive ryegrass. The perfect partner for tall fescue is Poa pratensis.

Very Rust Resistant

STARLETT is highly disease resistant, in particular towards rusts.

- Lolium Perenne**
- Very best wear tolerance
 - Very high shoot density
 - Fantastic persistency
 - Very high rust resistance

Very Best Wear Tolerance

The very high shoot density combined with the very good recovery of Greenway makes it an obvious choice also for sports areas. Especially the summer wear tolerance is extremely high.

Very High Shoot Density

In the official trials in France Greenway came out as one of the very best varieties with regards of shoot density. This was repeated in the STRI trials in UK.

Outstanding Rust Resistance

Rust attack is one of the severe diseases in perennial ryegrass, but do not worry - Greenway can beat it!
