

GREEN STAR REGENERATION

GREEN LINE for regenerations

Green Star Regeneration has been developed over the years taking into account specific regenerative needs, useful for periodically renewing the quality of grassy surfaces. The mixture of Lolium perenne quickly counteracts the damage caused by intense use of the coat.

CHARACTERISTICS

- Rapid germination
- Rapid establishment of the turf
- Good disease resistance
- High wear tolerance
- Excellent winter and summer color
- Good drought tolerance

Seeding rate

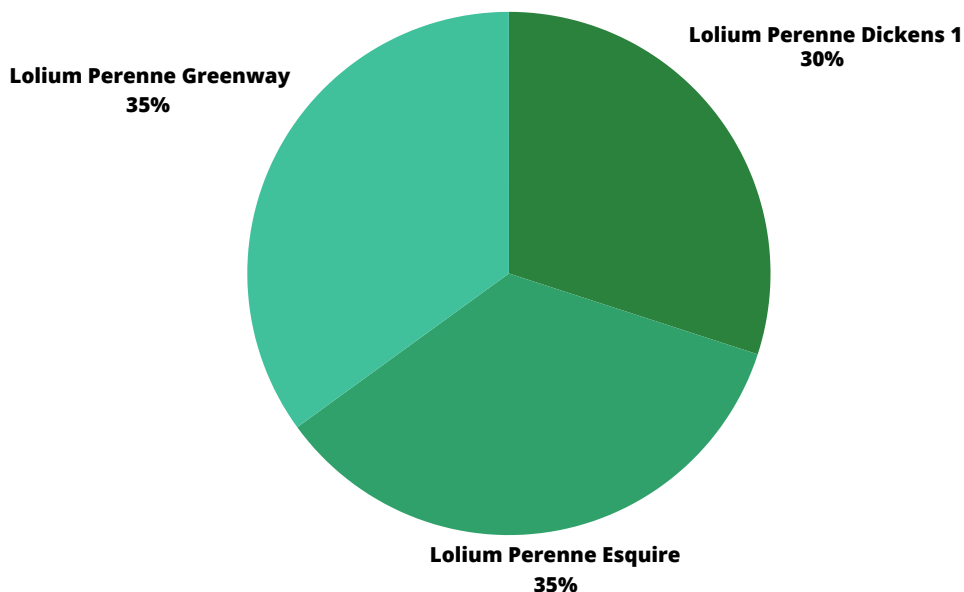

30 gr/mq

Cut height

2/4 cm

Period

From February to November

Packaging Kg. 1

Packaging Kg. 10

Perennial ryegrass

Convincing by Performance!

- Dark green colour
- Multi-resistant
- Very fast in establishment
- Combining density and wear tolerance

Ratings

Brilliant Future

ESQUIRE is one of the few varieties needing hardly any promotion. Since we started dispatching of seed for private trials we have had a very high positive feedback. Esquire's "field" performance is highly convincing!

Multi-Resistant

ESQUIRE resists well to winter damage and is tolerant to the majority of diseases of importance in the European Union and in North America; rusts, leaf spot, red thread and dollar spot.

First Out of Starting-Blocs

ESQUIRE takes off very early in spring with an impressive density. This explains also a very good wear tolerance. This is combined with good summer appearance and leaf fineness above average.

Lolium Perenne

- Very best wear tolerance
- Very high shoot density
- Fantastic persistency
- Very high rust resistance

Very Best Wear Tolerance

The very high shoot density combined with the very good recovery of Greenway makes it an obvious choice also for sports areas. Especially the summer wear tolerance is extremely high.

Very High Shoot Density

In the official trials in France Greenway came out as one of the very best varieties with regards of shoot density. This was repeated in the STRI trials in UK.

Outstanding Rust Resistance

Rust attack is one of the severe diseases in perennial ryegrass, but do not worry - Greenway can beat it!

Ratings

Scale 1-9, where 9 = best or most pronounced

Perennial ryegrass

Very fine leaved with high shoot density

- Very high shoot density
- Very fine leaf texture
- Very high density
- Top quality

Ratings

Top variety of the DLF portfolio

Due to the use and mixture partners the demand to the leaf size may be different.

DICKENS 1 has a very fine needle type leaf texture and in combination with the high shoot density it's the major reason to the harmonic and dense appearance of DICKENS 1.

The very good rating for amenity turf and wear tolerance of the RSM rating speak for themselves and show the superb quality of this variety.

If you talk quality turf you can not avoid using DICKENS 1!
