

BLUE COAT is an improved variety that incorporates the most recent advances in breeding technology to offer dense, fine leaf turf with dark green color and superior disease resistance. BLUE COAT has exhibited high resistance to rust and summer patch. It also provides a dark green color, fine to medium leaf texture and excellent density during the growing season. The ability to handle heavy traffic makes BLUE COAT an ideal choice for sod production, sports fields, parks and golf course fairways, tees and roughs. BLUE COAT mixes well with other Kentucky bluegrass, perennial ryegrass, tall fescue and fine fescue.

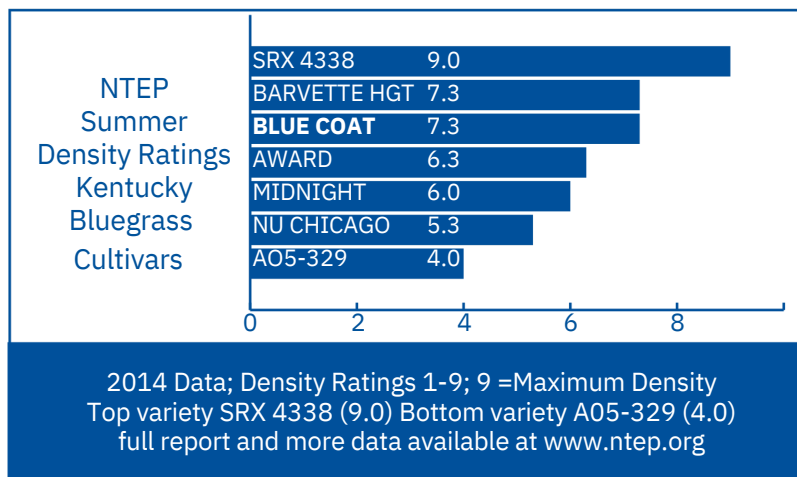

FACTS

- Excellent density during the growing season
- Dark green color
- High disease resistance
- Fine to medium leaf texture
- Excellent wear Tolerance

APPLICATION

- Residential Lawns
- Sports Fields
- Golf Courses

SEEDING RATE

- New Establishment:
3-4 LBS/1000 sq. ft.
- Overseeding:
1-2 LBS/1000 sq. ft.
